OSKITONE

DIY electronic musical instruments and soldering kits

Sold out

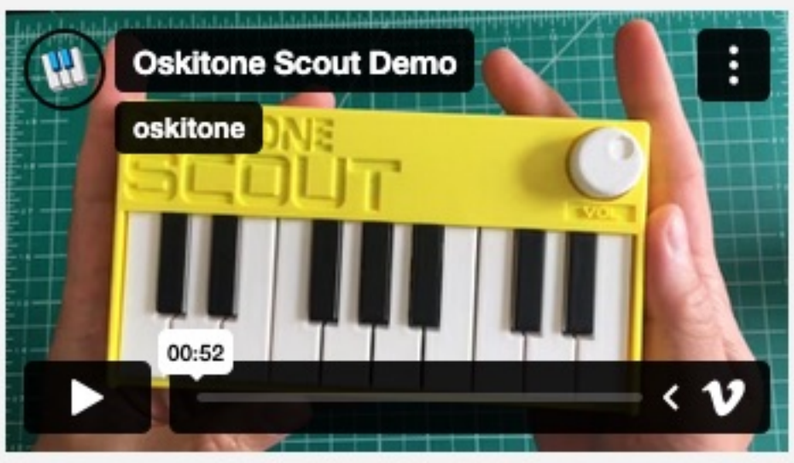
Scout Synth

$125.00

The Scout is an Arduino-compatible, monophonic, square wave synth. It's a no frills baby, baby!

- 17 keys
- Custom PCB and 3D-printed hardware
- Satisfying "clicky" tactile switches
- Built-in amplifier, speaker, and output jack
- Soldered, assembled, and ready to be played!
- Powered by 3 NiMH rechargeable AAA batteries, included
- Open-source and ready to be hacked. Re-programmable with FTDI cable (not included)

Also available as a DIY Kit.



Version: A
